

## Upgrade Today

Gemvision is making changes to our Upgrade Policy. To make this transition easier, we are offering discounted pricing to upgrade to Matrix Version 9 for all Matix users that are currently on version 8 or prior. This promotion will continue through August 31, 2018. After that date, the new Matrix upgrade policy will go into effect.

This means that after August 31, 2018, upgrading from versions prior to Matrix 8 will be more expensive. This will align our upgrade policy with our current support policy. Gemvision provides support only for the current version and one prior.

- Users will continue to have access to any version of Matrix that they have purchased, even if they have fallen behind on the “one version back” threshold. They will lose only their access to the discounted upgrade path, not the functionality of their current software.
- As we currently provide support for our newest version and one version prior, older versions may be at risk of no key replacements. Going forward, Gemvision cannot guarantee the availability of physical keys for older versions of Matrix, and therefore lost or damaged keys may become irreplaceable

Matrix 9.0		UPGRADE PRICING
YOUR CURRENT VERSION	9.0 UPGRADE PRICE <small>FIRST KEY</small>	SPECIAL PRICE <small>THROUGH AUGUST 31, 2018</small>
